

Perten – Manual Grain Moisture Meter

Aquamatic 5800 Grain Moisture Meter

Test the moisture of your grains right out of the grain dryer!

Designed for on-the farm use, the **Perten Aquamatic 5800 Manual Moisture Meter** is the most accurate and repeatable *portable* moisture tester available.

It measures test weight, hectoliter weight, and temperature with the same calibration as the officially approved AM 5200-A. The higher frequency signal provides greater penetration of samples and the UGMA (Unified Grain Moisture Algorithm) provides a more accurate result regardless of moisture level, temperature, or crop type.

Portable: Powered by two AA batteries and weighing only 9 lbs, you can easily take this portable unit wherever you need it.

Rapid: In less than 20 seconds, accurate readings for moisture, temperature, and test weight are shown on the display.

Easy to Use: No sample weighing or volume measuring is required, just pour the sample to fill the hopper and pull the handle to start the analysis.

Perten	AM 5800
ANALYSIS TIME	~15 Seconds
SAMPLE TEMPERATURE	-18°C to 70°C or -4°F to 160°F (moisture<18%)
SAMPLE SIZE	700mL
POWER REQUIREMENT	2 x AA Batteries
DIMENSIONS	13" x 11" x 11"
WEIGHT	9 lbs
